Esri Developer Summit

Deep Customization of ArcGIS Open Data

Andrew Turner, @ajturner, andrew@esri.com

Dave Bouwman @dbouwman, dbouwman@esri.com

Agenda

http://ajturner.github.io/presentations/ds-2016-od-customization

- ArcGIS Open Data
- Architecture
- Customizing Sites
- Components
- API Explorer
- Road Ahead

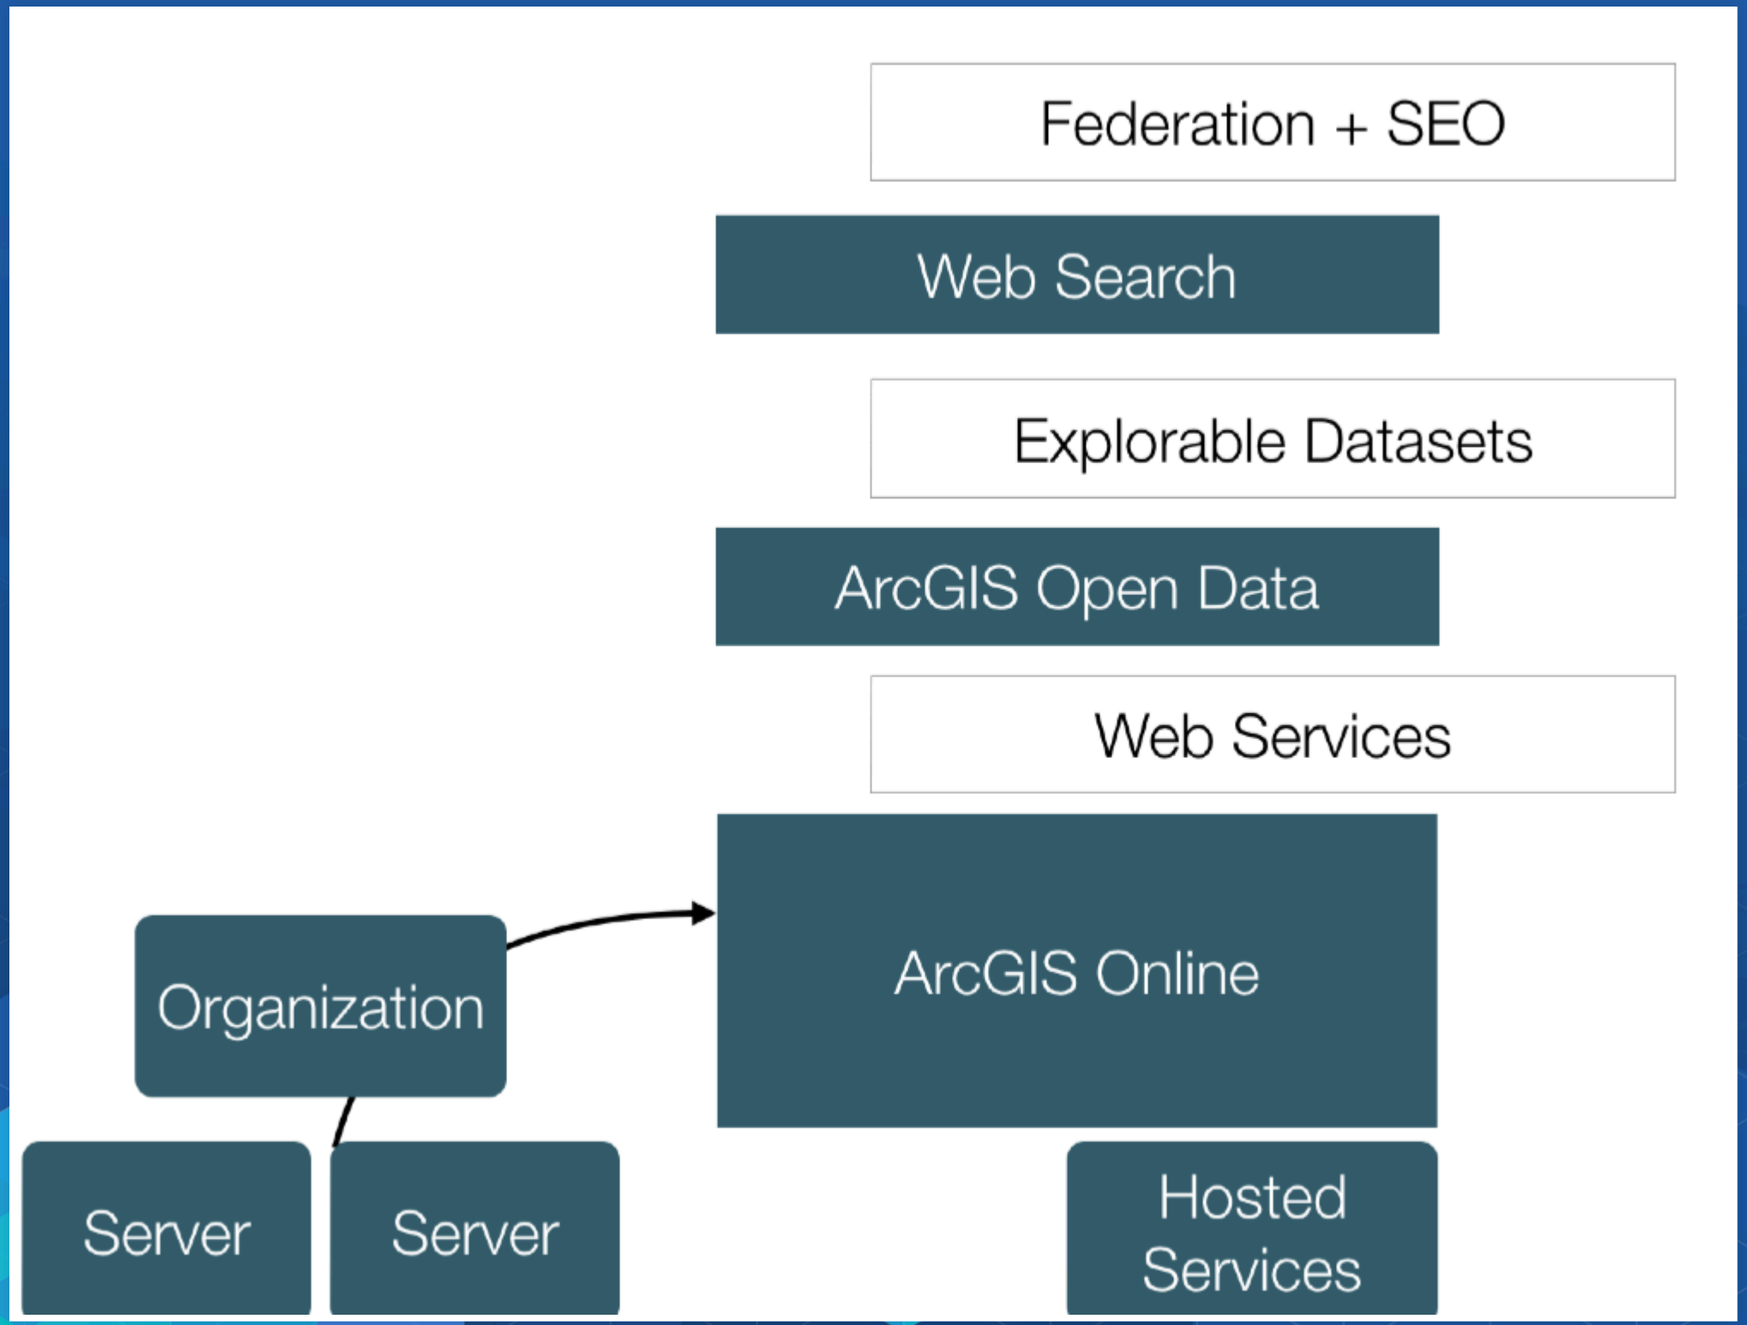

What is ArcGIS Open Data?

"Customizable site for organizations to provide data infrastructure to their public constituents."

- Washington, DC

Data-Driven Citizenship

Federation + SEO
Web Search
Explorable Datasets
ArcGIS Open Data
Web Services
ArcGIS Online
Organization
Server
Server
Hosted Services

Open Data capabilities

- Vector and Raster services
- Tabular data
- Smart Mapping, Charts, Table
- Full and Filtered Export as CSV, KML, Shapefile, GeoJSON
- Public user comment, favorites, custom views
- Faceted Search, Data recommendations
- Customized Style & Branding

Customizing Sites

- DHS HIFLD Open
- Iowa DOT
- Delaware
- Florida
- Washington, DC
- Open Data Community

API Explorer

- JSONAPI standard
- Hypermedia API
- API Explorer

Charts

- Cedar
- Cedar Dashboard

Koop

- API Converter
- KoopJS
- Socrata->ArcGIS

Winnow

- Winnow

```
const features = [...]
const options = {
  where: String // A sql where statement
  geometry: Object // GeoJSON or Esri geometry Object
  spatialPredicate: String // ST_Within || ST_Contains || ST_Intersects
  fields: Array // Set of fields to select from feature properties
  aggregates: Object // Describes the set of aggregations to perform on fields
}
winnow.query(features, options)
// Returns the set of features that match the query
```

Federated + Embeddable Search

- Open Data Search
- Charlotte Data.json + Data.gov integration

Open Source

- Open Data-Backbone
- Open Data-Ember
- Open Data Search

Road Ahead

More Open Source Starters

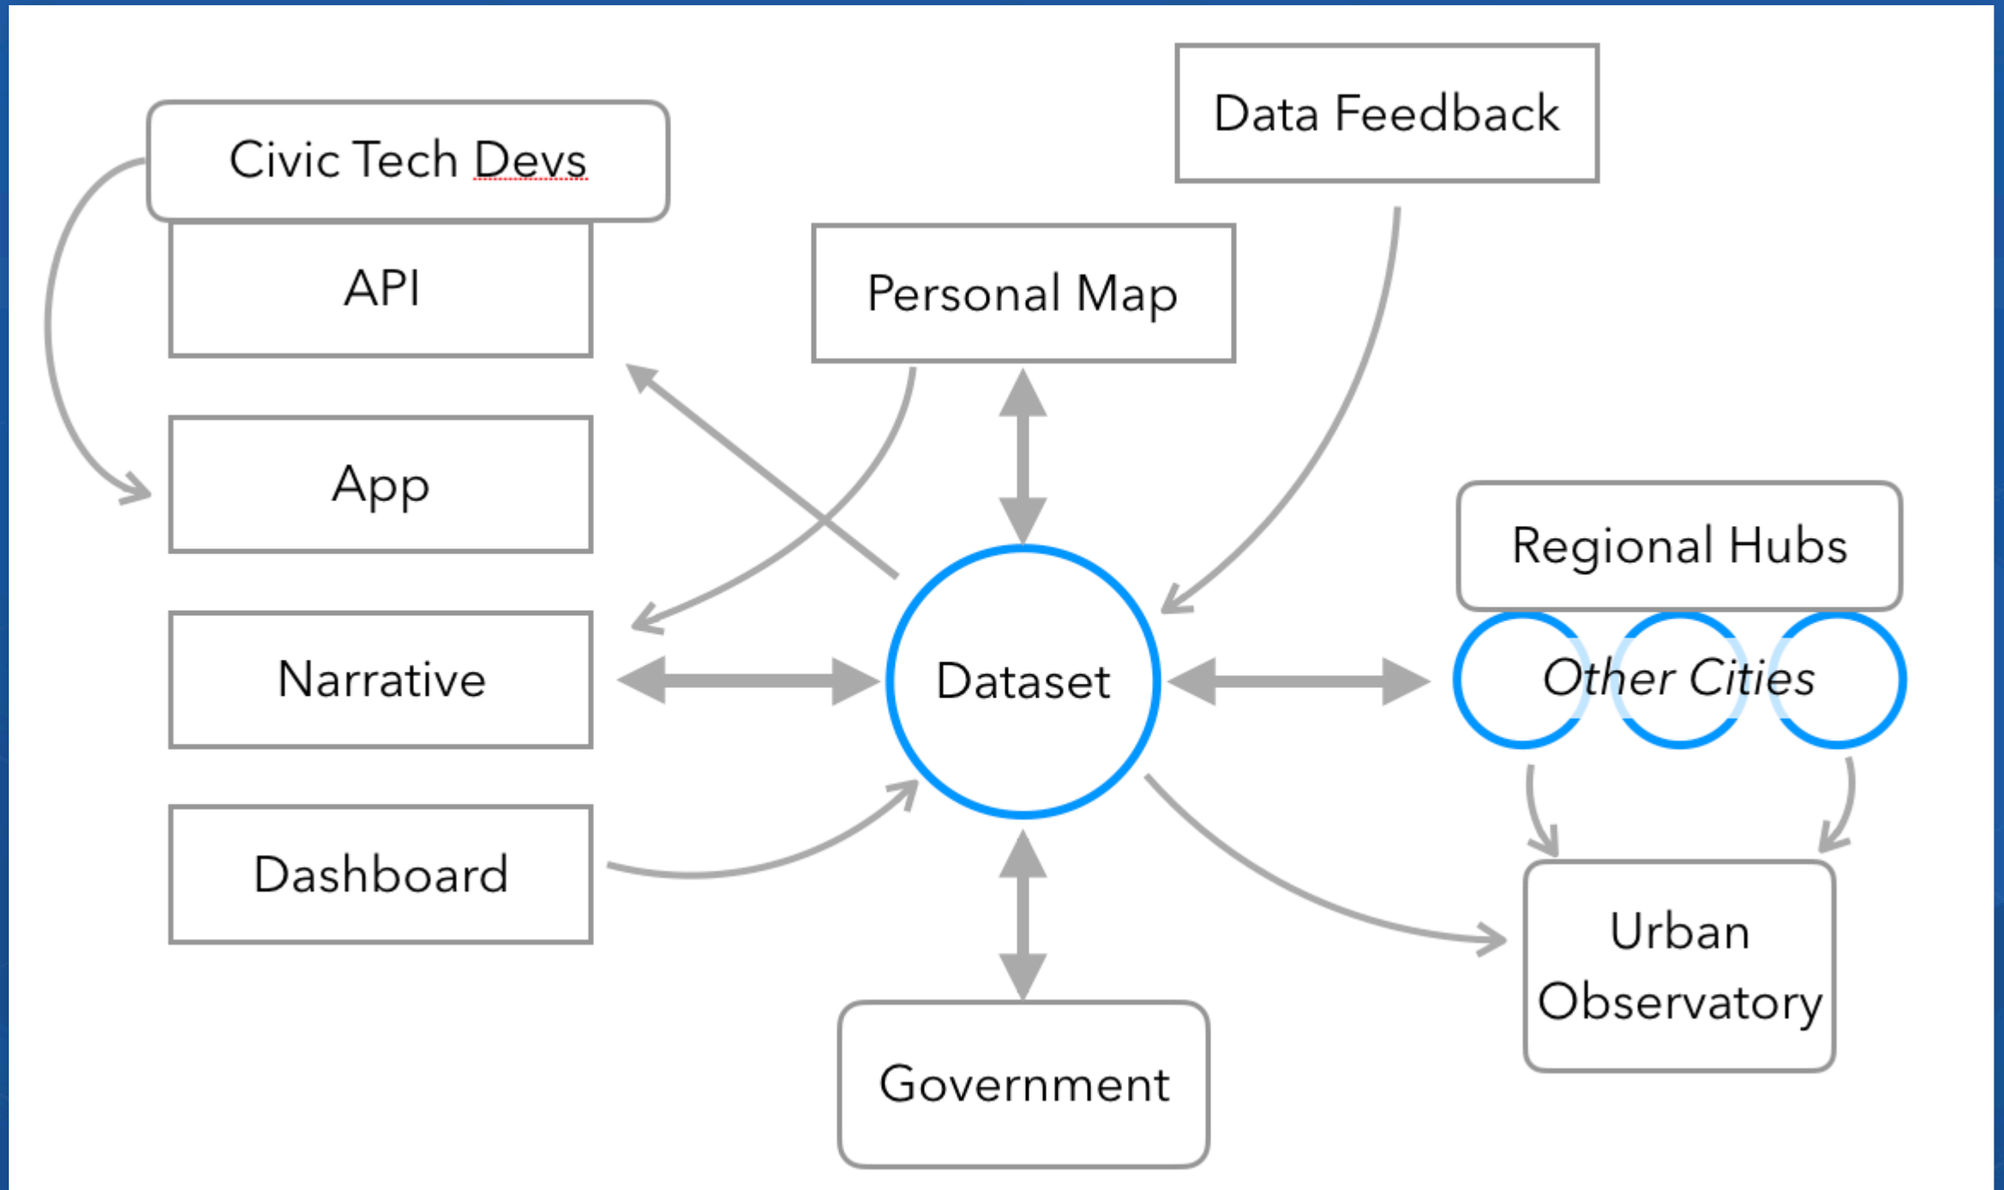

- OpenData-React
  - starter app for people looking to build w/ react
- OpenData-Angular2
  - starter app built on Angular 2

Road Ahead

Open Source UI projects

- EmberJs Application
  - "multi-tenant" system
  - i18n to 26 languages
  - you *can* fork and run this yourself...
  - much simpler to work from one of the starters
- Ember add-on with our components

Hub

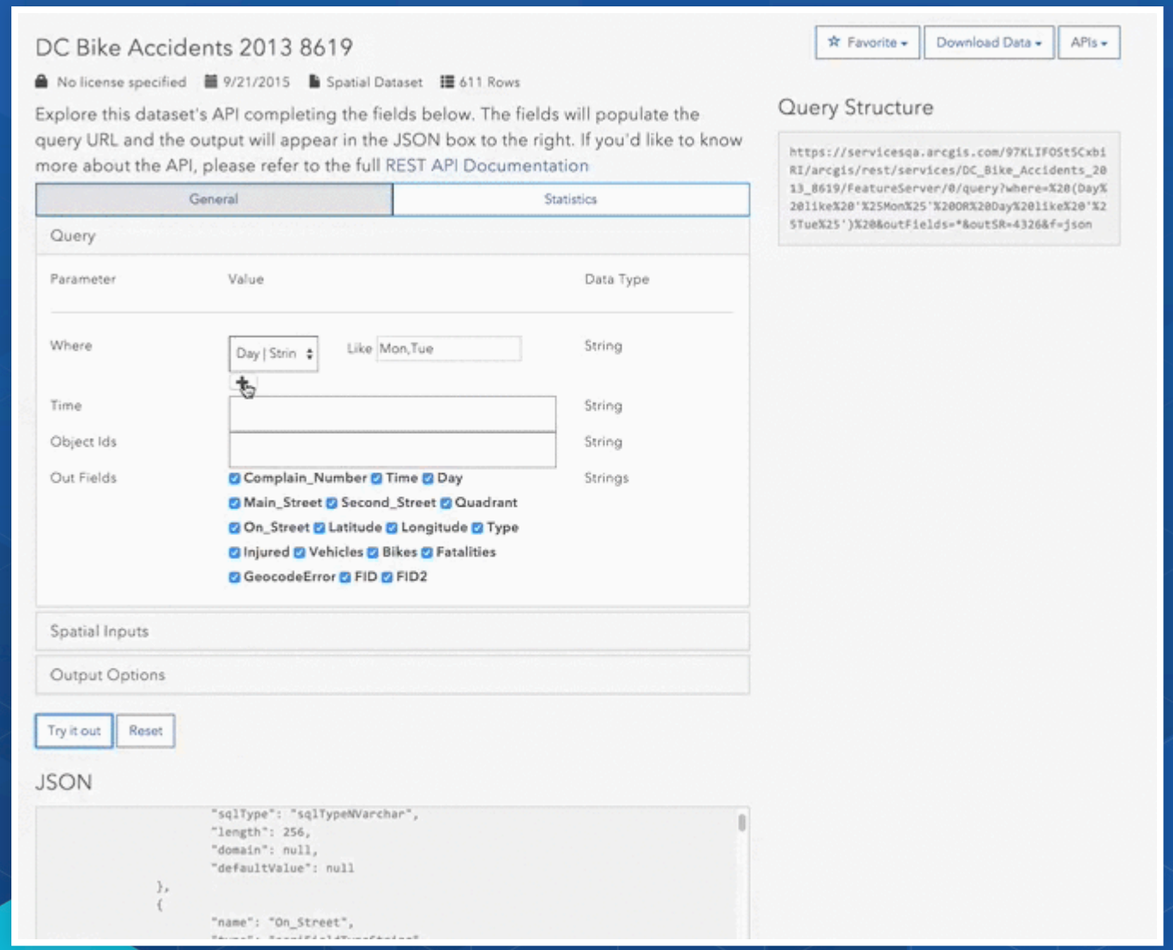

Civic Tech Devs
Data Feedback
API
Personal Map
App
Regional Hubs
Narrative
Dataset
Other Cities
Dashboard
Urban Observatory
Government

- Los Angeles Hub
- Washington Cities Hub
- Denton Texas Hub

Extensible and Modular

- Ember
- UN SDG Dashboard

GeoServices Explorer

- GeoServices RAML

Calcite shared branding

- Calcite-Bootstrap
- Integrated Solutions
