*'spacebar' to advance*
*'s' to show notes*
*'f' for fullscreen*

Esri provides tools to **make decisions**

We're hiring

# ArcGIS is a robust and full featured platform.

we work to provide easy to use tools and interfaces.

- Content
- Code
- Services
- Libraries

Develop the best technology possible.
Enable our community to solve problems.

are many and varied.

Want to enable people to have their own *vision* and **control their own future**

## Fred Brooks, The Mythical Man-Month

# Esri's *new* open-source support

Git started. gineers

# Cathedral & Bazaar

has been happening for a long time

# Esri as an open technology company

**Content:** OpenStreetMap, Geodata.gov

**Code:** PostgreSQL, OGR/GDAL, MySQL, MongoDB

**Services:** OGC, GeoServices, LDAP, OAuth, *Shapefiles*

**Libraries:** Dojo, Python, ArcScripts

Open-Source is as simple as... "**view source**"

Encourages people to learn through

- customize
- extend
- innovate

example,

- own your solution.

# Open-Source is an opportunity

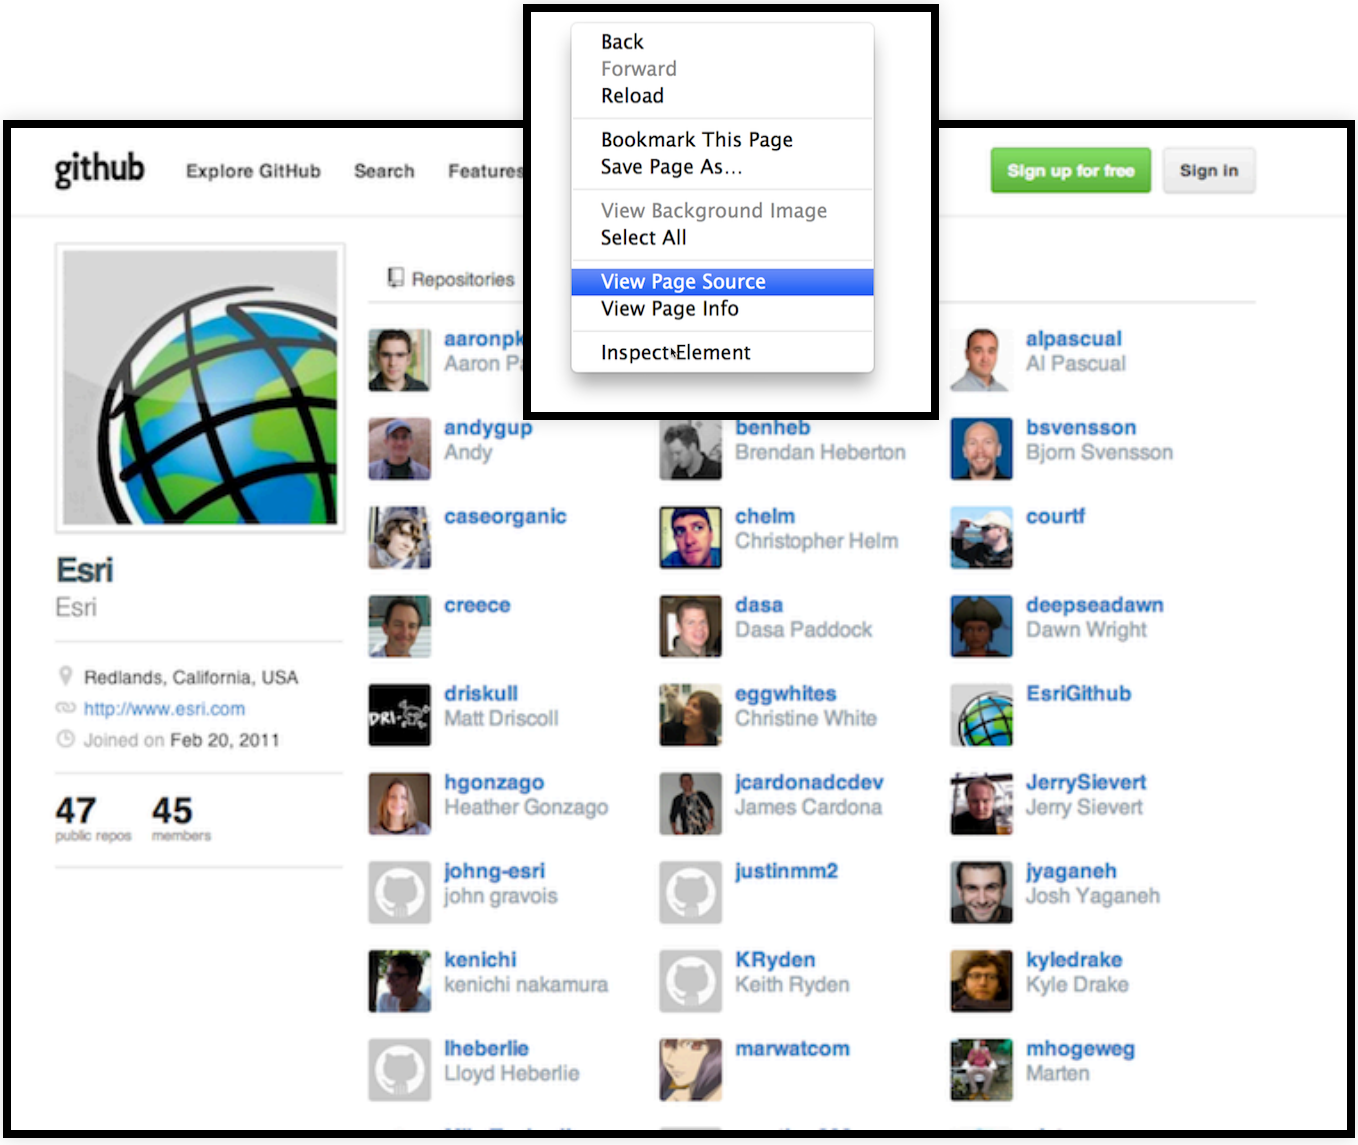

Will only work if **you** collaborate

more than just push

Many Languages: Javascript, Python, .NET, Ruby, PHP, Java, ActionScript/Flex, Silverlight, C
Web Applications, Mobile, Big Data analysis, Templates, Utilities

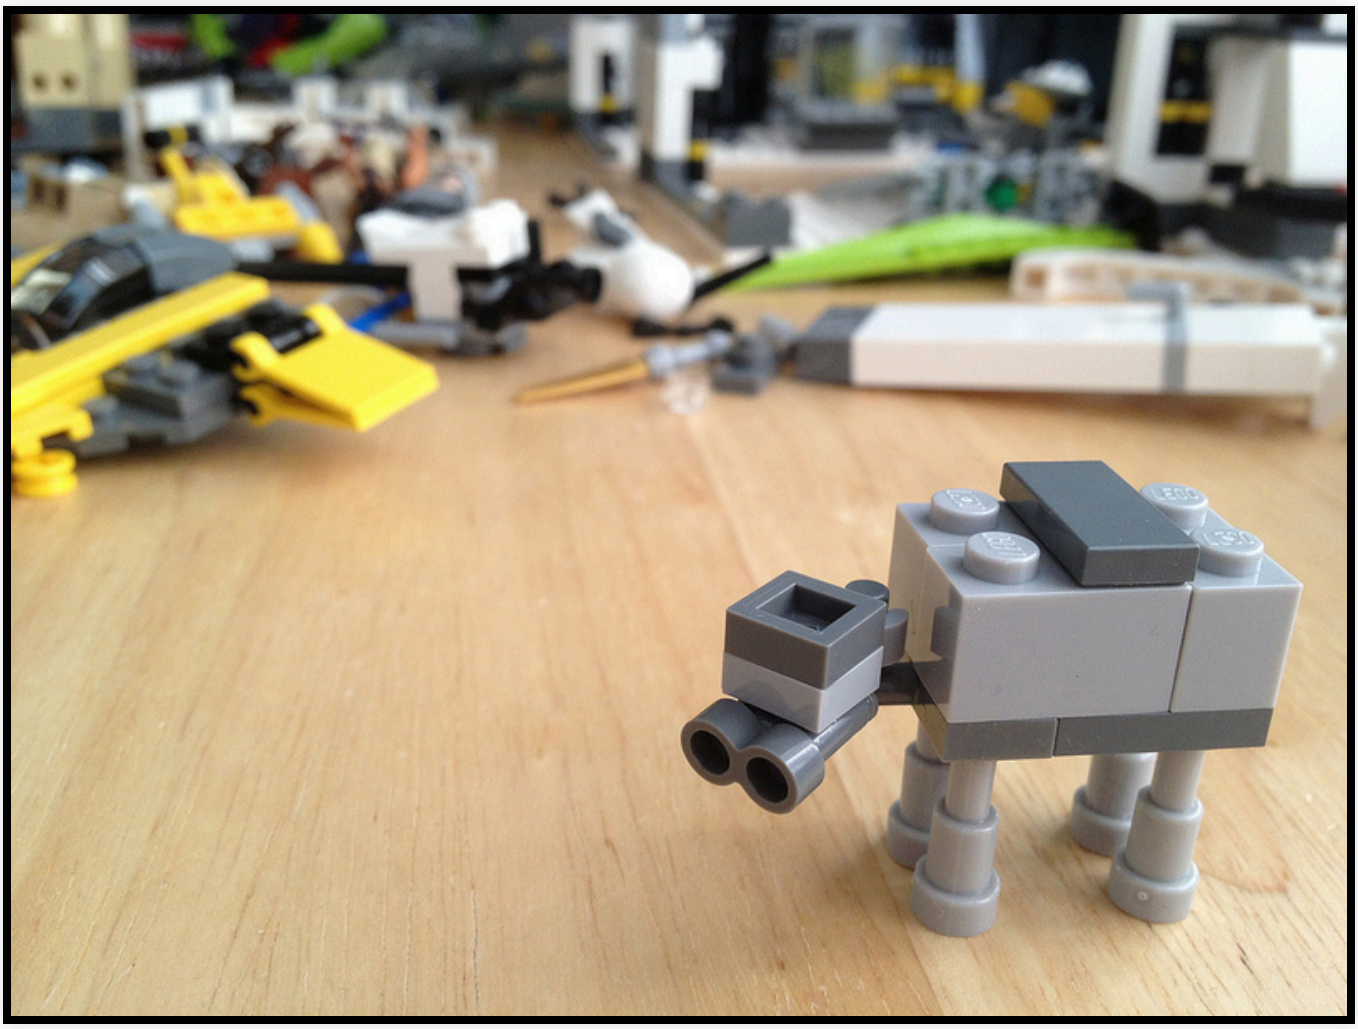

# doing it in the open
