$3 trillion annually

This is the 2013 Country Census - an index of the state of open data across the world! It is currently **in progress**.

NUMBER OF COUNTRIES **76** NUMBER OF DATASETS **724** NUMBER OF OPEN DATASETS **95** PERCENTAGE OPEN **13%**

The Open Data Census is an initiative of the Open Knowledge Foundation based on contributions from open data advocates and experts around the world. If you want to **add, change or improve an entry** please see the instructions. The results of the Census are used to create the Open Data Index, last published on October 28th 2013. You can see a list of our global community of contributors here.

Key: Yes No Unsure No data

+ Add data to the Census!

Sort
- alphabetically
- by score

	Transport Timetables	Government Budget	Government Spending	Election Results	Company Register	National Map	National Statistics	Legislation	Postcodes / Zipcodes	Emissions of pollutants	Total Score
United Kingdom											940
United States											870
Denmark											835
Norway											755
Netherlands											740
Ukraine											735
Finland											715
Slovenia											700
Sweden											670
New Zealand											660
Australia											660
Germany											610
Canada											590

Examples

USAID is working to support innovative applications of development data by the public sector, private sector, donors, partners and beneficiaries. We have built USAID.gov/developer to connect citizen developers with the tools they need to unlock government data to increase transparency, collaboration, and impact.

Software developers, researchers and partners are encouraged to use these resources to build tools to do development differently.

Application Programming Interfaces (APIs) and Datasets

Do you have feedback on any of these datasets or APIs? Please give us feedback on the USAID GitHub account

Development Credit Authority: Utilization and Claims API

USAID's Development Credit Authority (DCA) works with investors, local financial institutions, and development organizations to design and deliver investment alternatives that unlock financing for U.S. Government priorities. This dataset is the complete list of all USAID partial credit guarantees since DCA was established in 1999.

Development Credit Authority: Loan Transactions API

USAID's Development Credit Authority (DCA) works with investors, local financial institutions, and development organizations to design and deliver investment alternatives that unlock financing for U.S. Government priorities. This dataset is the complete list of all private loans made under USAID's DCA since it was established in 1999.

usaid.gov/developer

U.S. Official Development Assistance (ODA) Database

Annual funding by the U.S. Government to countries and territories on the Organization for Economic Co-Operation and Development(OECD) Development Assistance Committee(DAC) list of ODA Recipients, and to multilateral development institutions.

U.S. Overseas Loans and Grants (Greenbook) API

A complete historical record of all foreign assistance provided by the United States to the rest of the world back to 1946. It is a companion to the annual report to Congress, U.S. Overseas Loans and Grants, Obligations and Loan Authorizations-commonly known as the Greenbook.

United States Trade Capacity Building Assistance

Survey data that identifies and quantifies the U.S. Government's trade capacity building (TCB) activities in developing countries and transitional economies, including the funding levels for the period covering FY1999-FY2011 and summary activity descriptions of each of the project activities, for the period covering FY2002-FY2011.

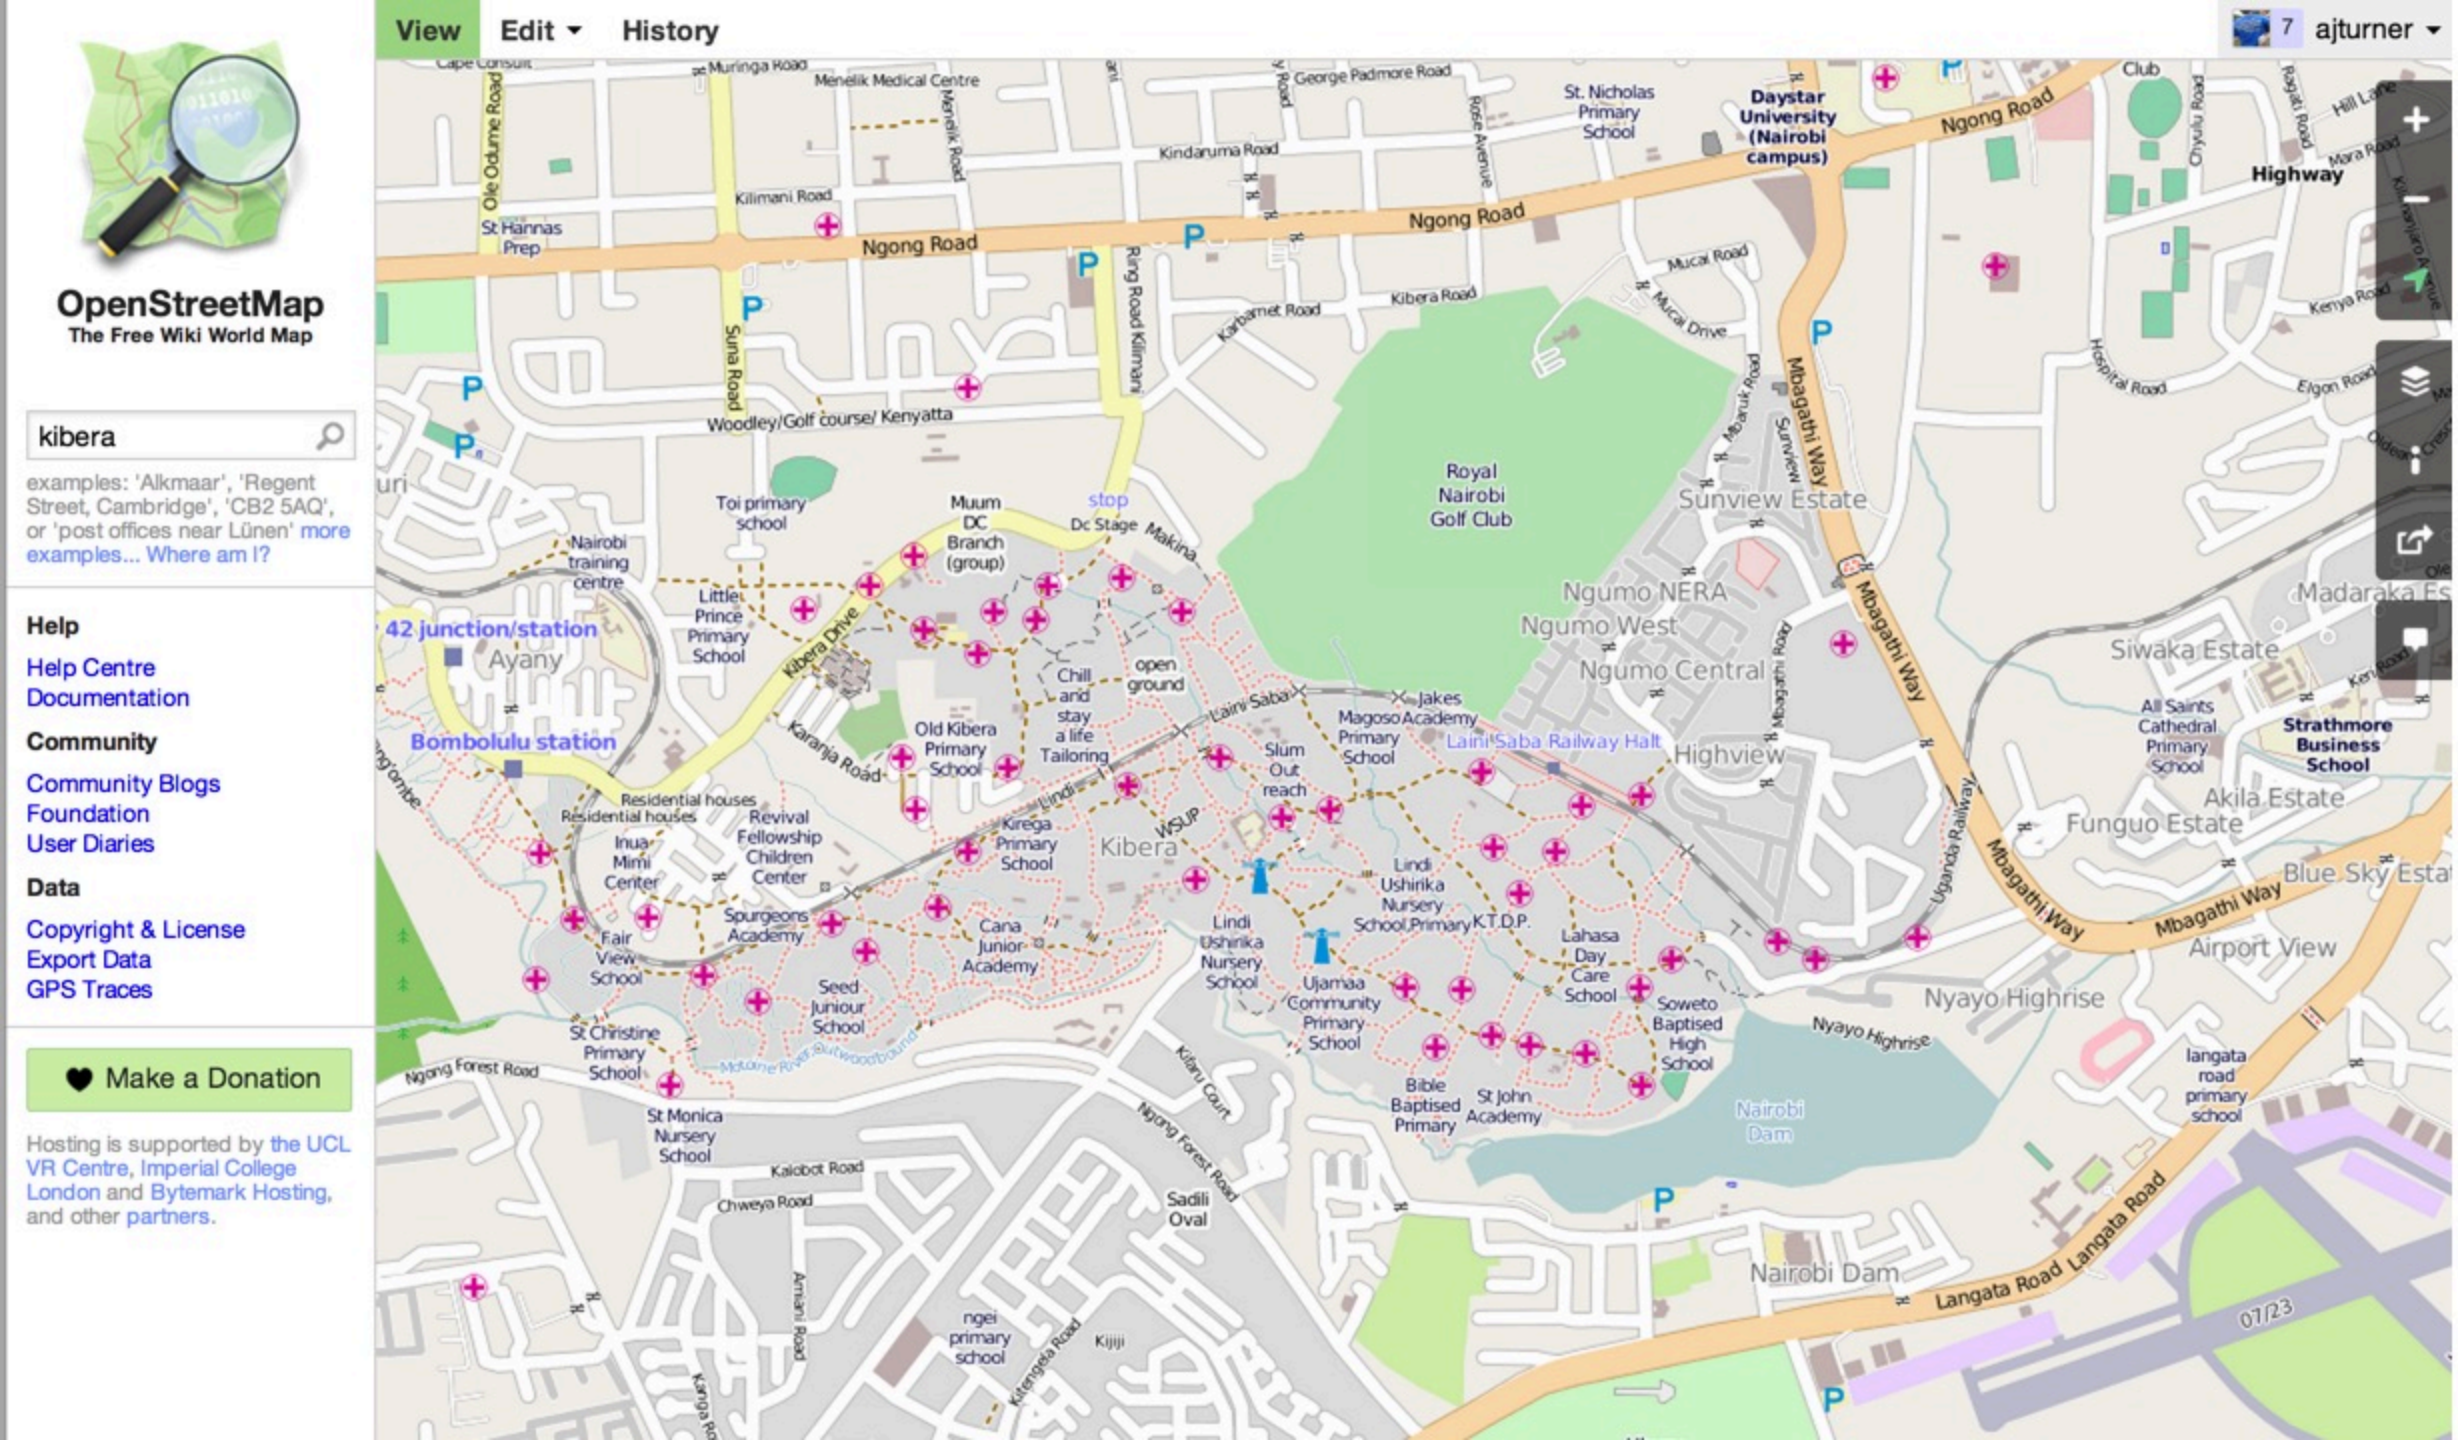

Feed the Future: Bangladesh Integrated Household Survey

The Bangladesh Integrated Household Survey dataset is a thorough assessment of current standard of food security in Bangladesh taken from 2011-2012. The dataset also includes all baseline surveys of nearly 6,500 households made under the USAID-led Feed the Future initiative, and will be used to measure progress over the next five years.

Feed the Future: Ghana Baseline Survey

These baseline surveys of nearly 5,000 households in Ghana capture all indicators outlined by the Feed the Future Initiative, and will be used to measure progress over the next five years.

DEMOCRACY AND GOVERNANCE

WHO'S DOING WHAT, WHERE?

The AidData Center for Development Policy creates geospatial data and tools enabling development stakeholders to more effectively target, coordinate and evaluate aid. Funded through a five-year, US$25 million cooperative agreement with USAID, the Center is a partnership between the College of William and Mary, Development Gateway, Brigham Young University, the University of Texas at Austin, and Esri.

USAID

FROM THE AMERICAN PEOPLE

Open Data Pipeline

1. Getting a view of what government data exists;
2. Increasing data transparency;
3. Improving open participation;
4. Enhancing open collaboration;
5. Realising ubiquitous engagement.

"About
one-third of the estimated potential value
from open data comes from benchmarking"

Opportunity

- Engagement Models
- Tools of Analysis and Transformation
- Citizen Collaboration
- Feedback Loops
- Information Empowerment
