Social Coding
with Git & Github

Andrew Turner - @ajturner

slides:
ajturner.github.io/presentations/social-coding

Level 1: Getting Started

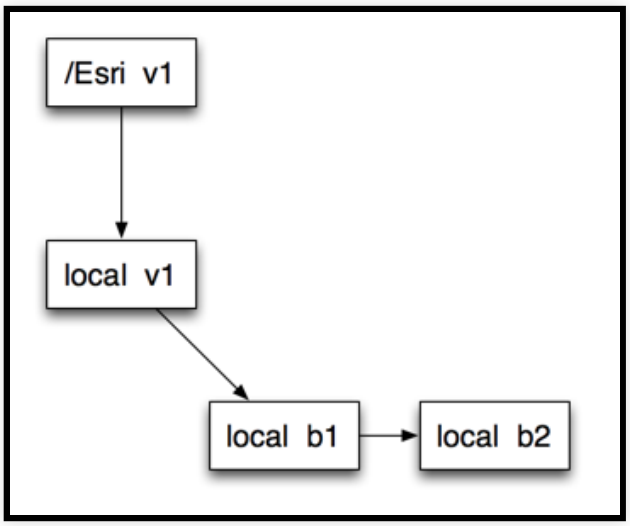

Git

25edcfe3312d7f7a307427265845e53a6b3fda10

Distributed version control

```
git clone
git@github.com:Esri/presentations.git
```

Simple branching

```
git branch ajturner-feature
git checkout -b ajturner-feature
git commit -am 'Added some new slides'
git checkout master
```

What is Github?

- Hosted Git
- Social Network for Code

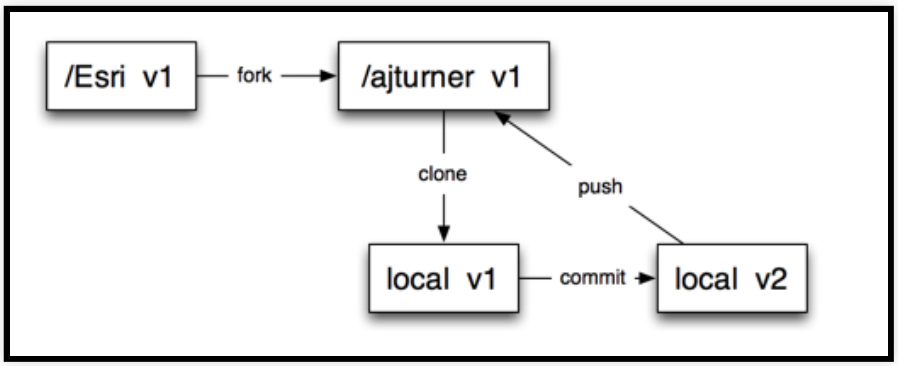

Level 2: Working in Git

init add commit pull push

Your first Repo

```
git init
git add Readme.md
git commit -am 'Initial Commit'
```

Working through Github

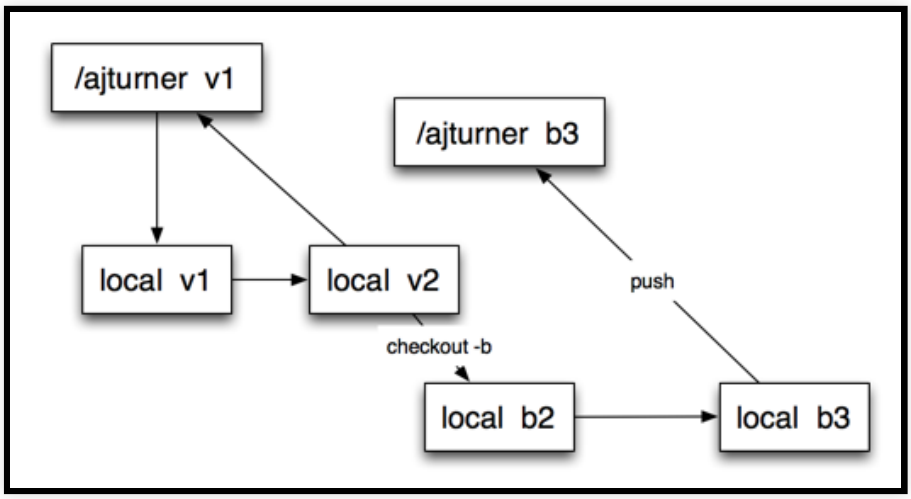

Create or *Fork* a Project

```
git clone
git@github.com:ajturner/project.git
git commit –am 'Fixed issue with bad
Titles #345'
git push ajturner master
```

Level 3: Better Collaboration

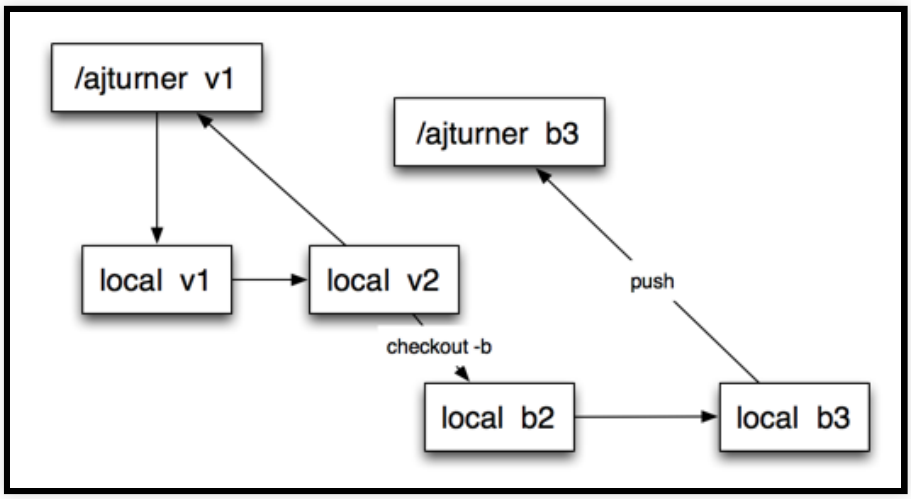

checkout merge

Branching

```
git checkout -b ajturner-newfeature
git commit -am 'Added feature #582'
git push ajturner ajturner-newfeature
git checkout master
git merge ajturner-newfeature
```

Pushing Back

```
git remote add upstream
git@github.com:Esri/project.git
git push upstream master
```

Level 4: Master

pull-request rebase

Contributing with Pull-Request

`git pull-request -b esri:master -h ajturner:master`

Keeping a Clean History

```
git checkout ajturner-newfeature
   git rebase upstream master
```

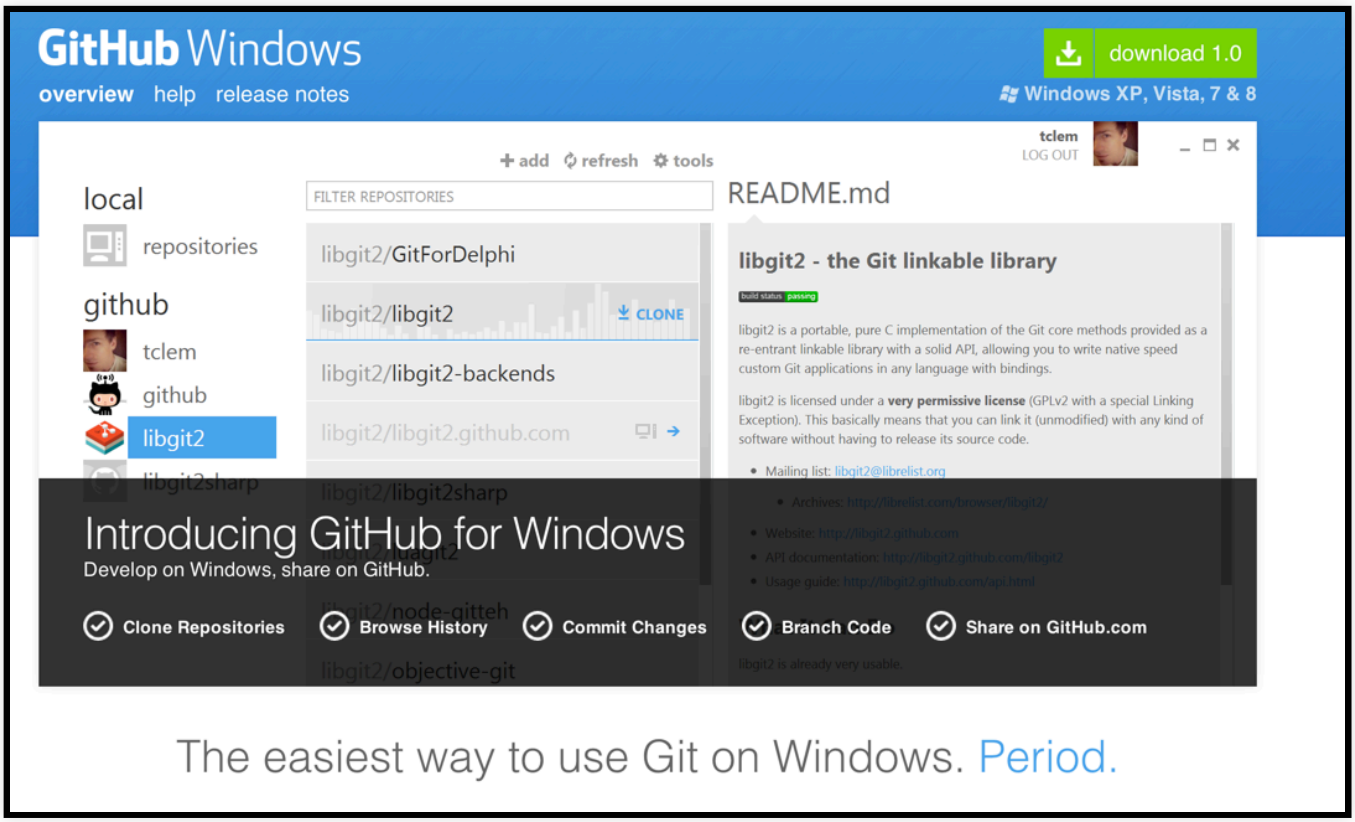

Ephiphany: Going Social
